Solidity Engineer

Summary

I am a Software Engineer from Podgorica, Montenegro with 5+ years of work experience. For most of my career, I have been working on native Android mobile app development with Kotlin or Java but recently I started exploring blockchain/web3 and have been working with projects related to NFTs and DeFi.

I have a year of experience with Solidity, using Hardhat, ethers.js, TDD, and also have some frontend dev experience, mostly React/Typescript.

I participated in many local programming workshops, hackathons, contests, and I am always striving to improve my technical skills and broaden my knowledge.

I mentored and taught Android development in two beginner courses and have led, and managed a mobile development team as well.

Work History

- | | |
|---------------------|---|
| June 2021 - Present | Smart Contract Engineer
<i>MVP Workshop</i>
Developing Solidity smart contracts for an NFT marketplace project on Polygon blockchain. |
| Sep 2020 - Oct 2021 | Android Engineer
<i>Infinum</i>
Working in an international IT agency with an experienced Android team for large-scale enterprise clients, mobile banking, telecom self-care apps, etc. |
| Sep 2019 - Sep 2020 | Mobile Development Lead
<i>Amplitudo</i>
Started as a Senior Android Developer and was promoted to Mobile development team-lead from November 2019 onwards.
Taught a 6 month Android course for beginner programmers. |
| Dec 2018 - Aug 2019 | Android developer
<i>GSS Media</i>
Worked on Android and Android TV apps for a live TV/Video on demand platform. |
| Oct 2018 - Jun 2019 | Android developer
<i>Sportamix</i>
App development for a youth sports networking platform. |
| Oct 2017 - Oct 2018 | Android developer
<i>SAFE Group</i>
I worked remotely for a health tech startup from Los Angeles. |
| Aug 2016 - Oct 2018 | Android & Fire TV developer
<i>GTV Corp</i> |

Worked on white label video streaming Android applications and Android TV and Fire TV apps. Remote position for a startup from the USA.

Mar 2016 - Jun 2016 Android & Web developer

Codingo

I worked as a developer working on android applications as well as some basic web PHP/Laravel projects.

Oct 2014 - Present Freelance Android developer

Self-employed

I worked on various projects that come from personal references and freelance platforms. On Upwork I had some projects for blockchain apps for example.

Jun 2014 - Sep 2014 Intern Android developer

Fleka

Summer internship at Fleka, interactive design studio based in Podgorica.

Nov 2013 - Jan 2014 Volunteer Android Developer

Telenor

I volunteered at Telenor to develop an app for Telenor's SurfWisely (Surfuj Pametno) initiative to educate children about using the internet safely. The application was launched to the public in January 2014.

Education

Sep 2015 - Nov 2017 Computer Science

University of Montenegro

I studied for two years on Computer Science at the Faculty of Sciences and Mathematics in Podgorica, at the University of Montenegro until I quit to focus on work.

2011 - Present Open online courses

Udacity, Coursera, FreeCodeCamp

I have enrolled in numerous online courses and they have greatly contributed to my education. I consider them essential for learning new skills.

2011 - 2015 High school diploma

Gimnazija "Stojan Cerovic"

I finished High School in Niksic, Montenegro.

Skills

Android

I have many years of professional experience with Android SDK and various 3rd party APIs, libraries, and SDKs like Firebase, Room, RxJava, Stripe, AdMob, Leanback, Exoplayer, Google Maps, Realm, Retrofit, Parse, Facebook, Crashlytics, etc. I worked on apps for mobile phones, tablets, and smart TVs.

Blockchain - Ethereum

Developing smart contracts in Solidity and working with web3 and ethers.js frontend libraries. Using hardhat for deployment to mainnet and testing contracts. I also have experience with OpenZeppelin upgradeable contracts and I have used their ERC20 and ERC721(NFT) interfaces.

Java/Kotlin

I develop native apps in Java and Kotlin. I started using Kotlin in 2018 and can use these languages interchangeably in the same projects. I am also familiar with various code architectures like MVP, MVVM, etc.

Database/SQL

I worked with SQLite databases, used Room ORM for Android. I had experience with Realm as a NoSQL example as well.

Git & Open Source

I use Git as my code version control system of choice. I am also an open-source supporter and try to contribute as much as possible to popular libraries.

Check my GitHub account:

<https://github.com/stevyhacker>

Web development

I have basic experience working with various web dev backend and frontend technologies in my career like React, Node.js, Laravel , etc.

Design tools

I have used various UI/UX tools like Sketch, Figma, Invision, Zeplin, Adobe XD, etc.
